Professional Summary

Motivated software developer with 2 years of experience in designing and enhancing web applications, specializing in front-end and back-end development with HTML, CSS, Tailwind, Bootstrap, Python, JavaScript, React, TypeScript, and Node.js. Known for improving user satisfaction and successfully attracting referrals through high-quality, user-centered website development. Skilled in refurbishing outdated websites to meet modern standards, boosting aesthetics and functionality.

Technical Skills

Languages: HTML, CSS, Python, JavaScript, TypeScript

Frameworks and Libraries: React, Node.js, Tailwind, Bootstrap

Tools: Git, GitHub

Professional Experience

Software Developer Intern

Sail Innovation Lab - Lagos, Nigeria

July 2023 – December 2023

- Collaborated with cross-functional teams on software development projects, contributing to the design, development, and deployment of key features.
- Built and maintained web applications using JavaScript, React, and Node.js, enhancing functionality and delivering a smooth user experience.
- Refurbished and updated existing websites with modern HTML, CSS, and Tailwind, resulting in improved user satisfaction and increased client referrals.

- Participated in Agile processes, including sprint planning and code reviews, to effectively deliver on project milestones and improve team productivity.
- Conducted testing and debugging, ensuring software quality and alignment with project requirements.

Education

Ordinary National Diploma (OND) in Computer Science

Lagos State Polytechnic - Lagos, Nigeria

Graduated 2023

Projects

E-commerce Website

- Developed a fully responsive e-commerce website for users to buy, sell, and order clothing items with an easy-to-navigate interface. Ensured accessibility across devices, optimizing for mobile, tablet, and desktop screens.

Technologies Used: HTML, CSS, JavaScript, React.

Gym Finder Fitness App

- Created a website to help users locate nearby gyms, view details, and register for memberships, enhancing convenience for fitness enthusiasts.

Technologies Used: HTML, CSS, JavaScript, React.

Hospital Locator Modeling App (In Progress)

- Collaborating with the Data Science department to develop a modeling app that connects users with hospitals nearby, allowing quick access to healthcare resources.

Technologies Used: Python, JavaScript, React, HTML, CSS.
